### **DETAILED ACTION**

1. The Notice of Abandonment mailed on January 24, 2006 is now withdrawn.
2. Applicant's amendment filed on March 16, 2006 has been entered and made of record.

#### ***Specification***

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In this case, the instant abstract contains more than 170 words so it is objected. See MPEP 608.01(b) and 37 C.F.R. 1.72(b).

#### ***Claim Objections***

4. Claim 9 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 7.

When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

In this case, claim 9 recites "Image processing device as claimed in claim 7". It is also noted that claim 7 recites image processing device. Therefore, both claims 7 and 9 are so close in content that they cover the same thing.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claim 10 is rejected under 35 U.S.C. 112, first paragraph, because of the reasons as follows:

Regarding claim 10, it recites “image processing device comprising means for iterating the method described for two images successive or not, in claim 1, on all the successive image in the image sequence”. It is noted that a single means i.e., means for iterating, is recited in this claim. Thus, claim 10 is considered as a single means claim and subject to an undue breadth rejection under 35 U.S.C. 112, first paragraph. See MPEP 2164.08(a).

***Allowable Subject Matter***

7. Claims 1-8, and 11-15 are allowed.
8. The following is an examiner’s statement of reasons for allowance:

Reference is made to page 8 of applicant’s response filed on March 16, 2006 as to the reasons for allowance of claims 1-8 and 11-15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
